I'm trying to understand the structure of the third universal characteristic classes of  $SO(3)$ . From the book "Differential forms in Algebraic topology" by Milnor, I've learned that the de Rham cohomology of the orientable compact  $3$ -manifold is computed by the formula  $\forall n \in \mathbb{N}, \forall \pi_1(SO(3)), \forall h \in H^k(\mathbb{R}^3), \int_{M_P} h = \sum_{i=0}^{3-1} \binom{3-1}{i} b_{2i}(M_P) \cdot \int_{D^{k-2i}} h$  where  $b_{2i}$  is the  $2i$ -th Betti number of  $M_P$  (with the convention  $\binom{0}{0} = 1$ ) and  $\int_{D^k} h$  is the  $k$ -th integral of the differential form  $h$  on the closed disk. This formula can be derived by the following identification of homotopy classes of loops in  $SO(3)$ :  $\pi_1(SO(3)) \cong \pi_1(\mathbb{R}^3) / \langle \rho^2 \rangle$  where  $\rho$  is the rotation by  $2\pi$  and  $\langle \rho^2 \rangle$  is the subgroup generated by  $\rho^2$ . Now let us set  $\lambda = \exp$

...Hej, Gonna start a new topic here because there's no one else who has problems with the v8.5 Pro. Alright, Lets start with my problem. I've started VirtualDJ. I've chose "Show DOS-Menu". I've activated as i'd hoped all the features on the screen and pressed "Start". Now i need to have some tracks / albums / playlists in the virtual DJ. I can select the playlist on vD j but it won't add or insert the tracks. .any help will be appreciated. Awaiting for your feedback. Tobi ...Music. It has been a great pleasure to work with so many of you on this project! I'm going to release a new version very soon that brings dozens of new features and bug fixes! Here's what's new: I've added in another more flexible mapping system. Now you can have the mapping system be any size! Once you have your mapping set, you can have it overlap, so you can change the mapping and still keep it expanded in the larger vD j screen. You can map any of your discs when you need to do that! Another major addition is the new "Recursive Save" feature. This means that all the features now save their settings to a new special file you can access by right clicking and "Recursive Save". So if you do a full update, you don't lose your files or the features. It saves in 3 different modes.. Any time you update a disk, it will save some of the features and data for that disk.. in addition to saving all the features for that disk, you will also. ...@mY ZX SUZUI XR-2M80C. I'm using Ubuntu version 13.04. I have VirtualDJ 8 installed on my computer already. But I can't get the XR-2M80C to be recognized by VirtualDJ. I followed many other tutorials to get VirtualDJ installed on my computer, including the most recent one at: VirtualDJ Setup, Getting Started. But nothing works. The tablet is not recognized by VirtualDJ. ...the dream Team 3.0.0 with custom skins for vD j. So, I decided I had to start from scratch and do a reinstall and I got a problem. I have installed the pro version and I got a link to virtualdj config.exe
