by Y Yan · 2019 â€" 146. Figure 4.28. Aberration Measurement Setup and 3D Contrast In this project, Zemax OpticStudio was used to perform actual ray tracing and lens. For more information on projector operation, please refer to Chapter 2. This chapter covers the use of two projectors. Typically, they are used to view images taken with a digital camera and images created in photo labs using a digital microscope. At the same time, images obtained from digital cameras usually do not have distortions, unlike images obtained in photo labs. dd2bc28256
